

# RDM SYNERGY™

One Solution for All Payments.

A Unique Payment Solution  
for Cards and Checks

## Benefits at a Glance

- Supports acceptance of all payment types through a single point-of-sale device
- All-in-one design ensure simple installation and use and minimizes counter clutter
- Automatically franks checks to ensure compliance and point-of-sale efficiency

The RDM SYNERGY™ is an ideal solution for processing all card and check payments through one easy-to-use device. The all-in-one design incorporates magnetic card swipe, check imager/reader and a fast and quiet thermal printer, eliminating extra clutter and cables on your countertop. In addition, the easy-to-use interface and automatic check imaging and franking capabilities ensure a fast and efficient point-of-sale process. The RDM SYNERGY supports payments acceptance including credit, electronic check conversion, and electronic gift card; with the addition of a PIN pad, you can also accept PIN-based debit and electronic benefits transfer (EBT) transactions.

## Simple To Install & Learn

- All-in-one design ensures simple installation and reduces cable connectors and counter clutter
- 20-key keyboard and large graphics display allow easy initiation of all daily functions and transaction types
- Built-in thermal printer provides fast, quiet receipt delivery
- Built-in check imager converts paper checks to electronic transactions

## Efficient & Secure

- Fast processing speed for efficient point-of-sale transactions
- Automatic "franking" feature prints "ELECTRONICALLY PRESENTED" on the check – increasing check acceptance efficiency and ensuring compliance with all electronic check acceptance regulations
- Supports the latest security protections, including DUKPT and triple DES PIN encryption, ensuring PIN-based transactions are processed in a safe and secure manner
- Images are compressed into a small file size for fast uploading

## Flexible & Reliable

- Supports acceptance of all credit cards, check transactions, and electronic gift cards through a single point-of-sale device
- With the addition of a PIN pad, you can accept PIN-based debit and electronic benefits transfer (EBT) transactions
- Industry-leading check MICR read rate that exceeds 99.9%
- Superior paper handling that reduces paper jams and imaging errors, helping to ensure maximum "up time"

Process All Card  
and Check Payments  
Through One  
Easy-to-Use Device.
